VIVO — VivoPower PLC

Nasdaq briefing · 14 August 2026 (US session) · Research only, not investment advice

$4.80, $147 million market cap. Daily and weekly money flow turned constructive after the July washout; monthly flow is still mixed. The audited company (FY2025 continuing revenue $61,000) does not yet match the Norway AI-landlord story. Price is a narrative plus tight-float vehicle, not a cash-flow multiple.

$4.80 Last (14 Aug session)	**$147M** Market cap	**+4.5% / +25%** 1 day / 5 day	**+96% / –24%** Year to date / 1 year
$1.20–$6.86 52-week range	**0.33×** Today vs 20-day volume	**72.5% / 8.5%** Insider / institution	**$10** Noble target (1 sponsored analyst)

1. Flow — daily, weekly, monthly

Daily — constructive

CMF20 +0.16 · MFI 52 · RSI 60
5-day net +$7.9M (88% up-dollar)
21-session dollar flow +$15.3M · price +9% over 21 trading days
Above 20-day ($3.94) and 50-day ($4.60) averages. Today's bounce is on light volume — bid is there, sponsorship is not loud.

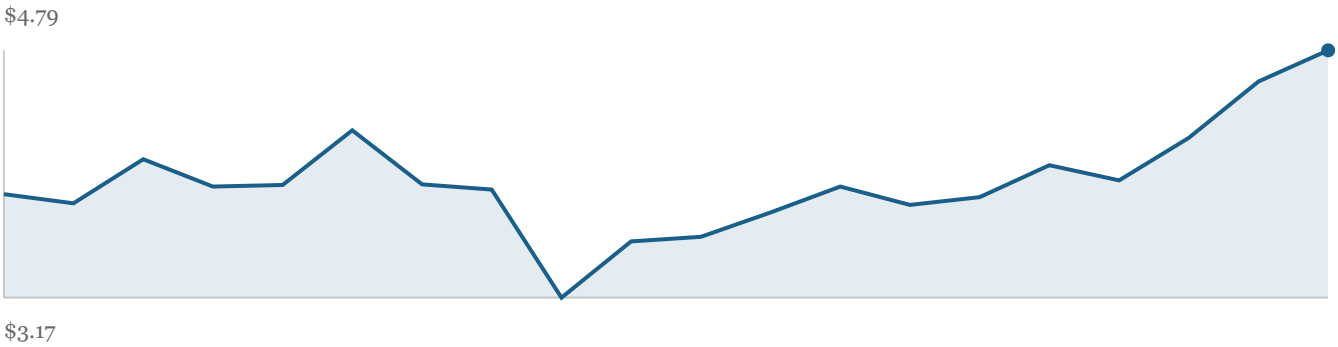

Weekly — repair

This week +18.7% · CMF +0.10 · RSI 55
Last 4 weeks in the table below: net +$16M · 66% up-dollar
13-week dollar flow +$60M with price roughly flat
May spike to $6.24, then July $3.57. Last two weeks: higher lows on shrinking volume. Repair, not a new volume thrust.

Monthly — mixed

August so far +34% (9 sessions, 81% up-dollar)
May +88% · June –17% · July –31%
12-month net –$20M (49% up-dollar)
May was the regime month. Summer gave it back. August is a partial reclaim.

Daily close — last 20 sessions

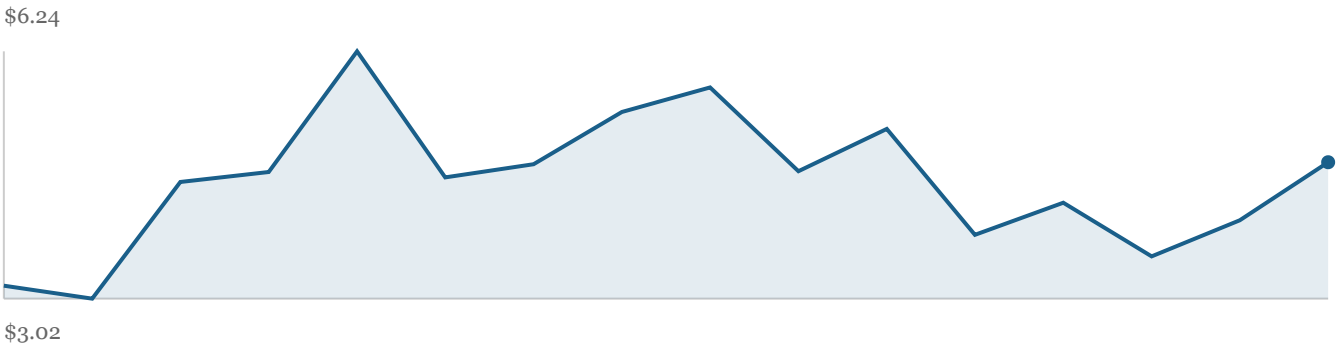

Source: Yahoo Finance · 17 Jul – 14 Aug 2026 · last $4.80. 50-day average $4.60.

Daily volume (million shares)

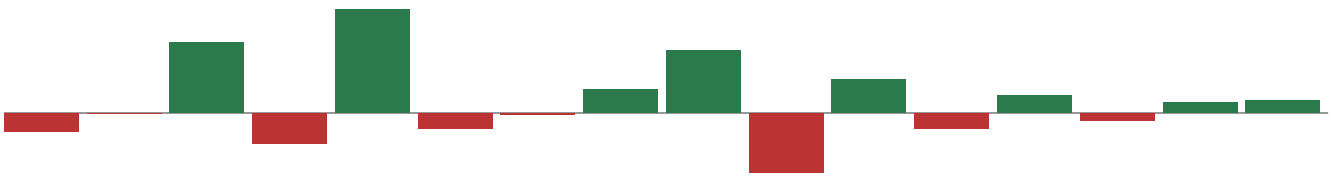

21-day average volume about 0.71 million. Today 0.22 million.

Weekly close — 16 weeks

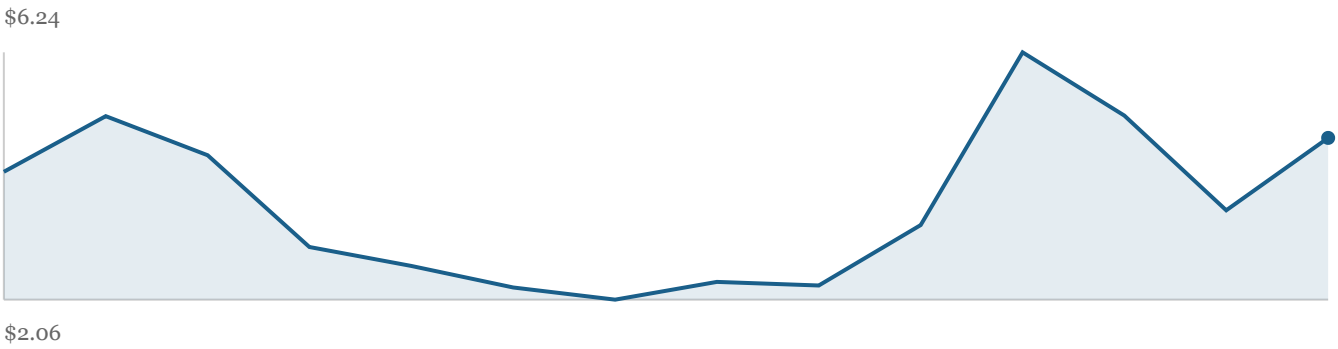

Weeks ending Friday · 27 Apr – 14 Aug 2026. 52-week high $6.86.

Weekly net dollar flow ($ millions)

Up-day dollar volume minus down-day. Green = net buying, red = net selling.

Monthly close — 14 months

Jul 2025 – Aug 2026 (August through the 14th).

Monthly price return (%)

2. Weekly tape (last 8 weeks)

Week	Close	Return	Volume	Net $M	Up-dollar %
26 Jun	$5.77	+5.9%	7.16M	+29.7	86%
3 Jul	$4.68	−18.9%	5.55M	−28.2	0%
10 Jul	$5.23	+11.8%	5.54M	+16.1	80%
17 Jul	$3.85	−26.4%	5.00M	−7.6	32%
24 Jul	$4.27	+10.9%	4.78M	+8.3	72%
31 Jul	$3.57	−16.4%	3.49M	−3.7	35%
7 Aug	$4.04	+13.2%	2.46M	+5.1	77%
14 Aug	$4.80	+18.7%	1.95M	+6.2	86%

Volume is falling as price reclaims. That is a quieter bid, not a breakout.

3. Monthly tape

Month	Close	Return	Volume	Dollar $M	Up-dollar %
Feb 2026	$2.36	+14.6%	32.2M	70	67%
Mar 2026	$2.30	−2.5%	14.1M	33	61%
Apr 2026	$3.32	+44.3%	20.9M	65	49%
May 2026	$6.24	+88.0%	43.3M	202	66%

Jun 2026	$5.17	–17.1%	36.3M	199	54%
Jul 2026	$3.57	–30.9%	21.1M	91	51%
Aug 2026*	$4.80	+34.3%	4.4M	18	81%

*August through 14 Aug (9 sessions). May was the volume event. July sold off with a roughly 50/50 dollar split — weak bid, not a panic dump.

4. Structure, short, options

Share structure

Shares out 30.7 million · reported float 1.77 million · insiders 72.5%.
Short 2.17 million (was 2.43 million) · 2.21 days to cover.
Yahoo's "7.6% of float" disagrees with 2.17M / 1.77M. Simply Wall St printed ~72% of float. Do not size a squeeze on one number.
Dual-class shares compressed the tradable float.
Yahoo bid/ask was $3.35 / $5.40 — thin book.

Options (expiry 21 Aug 2026)

Call open interest 7,749 · put 1,230 · put/call OI 0.16
Call volume 573 · put 22 · put/call volume 0.04
$5 calls: last $0.30, IV 137%, OI 4,747
$7.50 calls: last $0.09, OI 2,479 (PIPE converts at $7.50)
21 Jul: 8,621 calls vs ~2,050 average — lottery-call tape, still call-skewed into this week.

Largest reported holders (lagged 13F)

Holder	Shares	% of 30.7M	Change	As of
Jane Street	168,603	0.55%	+169%	31 Mar 2026
UBS	118,674	0.39%	+64%	31 Mar 2026
LPL Financial	103,915	0.34%	+573%	30 Jun 2026
Susquehanna	71,119	0.23%	–48%	31 Mar 2026
Simplex Trading	68,926	0.22%	+1,556%	30 Jun 2026
ACT Capital	42,500	0.14%	new	30 Jun 2026

Share counts from Yahoo 13F. Percent is of current 30.7 million shares outstanding (Yahoo's own % figures were stale and overstated). Yahoo still prints 8.5% institutional in aggregate across 35 holders. Mostly market-makers. Blue Sky Capital (July PIPE) is not in this cut.

5. Story vs audited company

FY2025 (year ended 30 Jun 2025) is still a shell on the books. Continuing revenue $61,000. Net loss $12.8 million (three-year cumulative about $83.8 million). Cash at 30 Jun 2025 was $60,000 (Yahoo now shows about $7.1 million after later PIPEs). Equity flipped from −$40.5 million to +$20.1 million mostly by booking a $60.5 million placement as a receivable. Auditor going-concern language three years running. FY2026 ended 30 Jun 2026; that annual report is not out yet.

What they sell (deck / press)

- Powered-land landlord for sovereign and hyperscaler AI
- Norway Mo i Rana ~42 MW, cheap hydro power
- Pro forma ~$31 million hosting revenue claimed on that site
- “358 MW secured” = 42 Norway + 291 Finland (28% stake) + 25 UAE intent
- Tembo e-LV SPAC: ticker TEMB reserved, $838 million pre-money claimed
- 2029 vision: 2 GW / $1 billion revenue (a deck, not a forecast)

What is actually filed

- Only controlled operating megawatts: Norway ~42. Finland is 28%. UAE is intent.
- No signed hyperscaler lease in the public record reviewed (May: shortlist only)
- 29 Jul: $50 million PIPE, converts at $7.50, 6% PIK prefs + warrants. Lead: Blue Sky Capital
- 3 Aug: $28.8 million founder-loan principal retired. Accrued interest still due
- Tembo listing still needs SEC F-4 and a SPAC vote. Residual % unknown

Capital events that moved the stock

Date	Event	Tape read
16 Mar	Ticker VVPR → VIVO	Rebrand to AI data-center identity
26 Mar	Nasdaq reserves TEMB; $838M pre-money claimed	Optionality headline; close not done
May	Norway narrative + tenant shortlist; 43M shares	Regime month: +88%, $202M notional
13 Jul	Noble Outperform / $10 (sponsored)	One paid voice, not street consensus
21 Jul	8.6k calls vs 2.0k average	Spec call sweep into $5 / $7.50
29 Jul	$50M PIPE at $7.50 convert	Stock sold to $3.17 that day
3 Aug	AWN $28.8M principal gone	Overhang removed; interest residual remains
13–14 Aug	Reclaim $4.59 → $4.80	CMF still rising; volume mixed

6. Valuation (with the brakes on)

A discounted-cash-flow model on trailing numbers is not usable (revenue $61k, free cash flow –$67 million on Yahoo). Peer EV/sales of 1,181× vs Equinix ~13× is a category error until Norway is in the audited P&L. One sponsored analyst has a $10 target.

Method	Implied	Weight	Why
DCF	n/a	0%	Negative cash flow, no consensus path
Peer multiples on TTM sales	n/a	0%	TTM sales are leftover kits, not data-center rent
Norway asset	~$3–5 if 42 MW is real	40%	Purchase ~$41M; claimed ~$10M EBITDA × 4–10x
Tembo residual + Finland 28%	$8–12 only if TEMB closes	30%	$838M is a SPAC marketing number

PIPE convert / warrants	caps easy upside into $7.50	30%	$50M prefs convert at $7.50 + PIK + warrants

~$2–3
Bear — Norway slips / more dilution

~$4.50–5.50
Base — current, story half-in

~$7.50–10
Bull — convert magnet + Noble

Until the FY2026 annual report consolidates Norway revenue and a signed AI lease, $4.80 is a bet on the story plus a tight float.

7. Peers (context, not comps)

Ticker	Price	Mcap	EV/Rev	YTD	1 month
VIVO	$4.80	$147M	1,181×	+96%	+9%
APLD	$30.87	$8.9B	24×	+10%	+17%
IREN	$45.30	$16.2B	23×	+6%	+30%
CORZ	$20.04	$6.4B	20×	+25%	–5%
NBIS	$270.94	$68.8B	53×	+202%	+58%
EQIX	$1,083	$107B	13×	+43%	+7%
DLR	$200	$75B	14×	+31%	+15%

VIVO is 50–400× smaller. EV/Rev uses trailing $61k sales, not the $31M pro forma claim.

8. What has to be true / what breaks it

Bull path

- Next annual report shows Norway hosting in the tens of millions, not $61k
- Named AI or sovereign tenant on a 15–25 year lease
- TEMB lists; VIVO keeps a real stub
- No more emergency equity
- Float stays tight

Break points

- Another story pivot (energy → crypto → data center already happened in 18 months)
- Finland 28% never becomes cash
- PIPE prefs + warrants grind the common
- Tembo SPAC fails
- Nasdaq listing tests if cash burns again

9. Near calendar

Item	Timing	Why it matters
Weekly options expiry	21 Aug 2026	$5 call wall, 4,747 open interest; stock is just under

FY2026 annual report (20-F)	Usually autumn after 30 Jun year-end	First chance to see Norway in audited revenue
TEMB / CCTS F-4	Unscheduled	Binary for the Tembo stub
AWN accrued interest	“In due course” (3 Aug release)	Principal gone; cash still leaves

Sources: Yahoo Finance (14 Aug 2026), company GlobeNewswire releases (29 Jul PIPE, 3 Aug debt), SEC FY2025 20-F/A, Noble initiation 13 Jul (sponsored), Tembo ticker release 26 Mar. This is a research briefing, not a recommendation to buy or sell.
